KEYBOARDS & SCANNERS

On Group International supplies fully customisable keyboards and peripherals that meet the fast-paced needs of competitive industries including banking, finance, insurance, health and travel.

Specialised cheque micr-reading devices, magnetic stripe & smart card readers and writers, optical character recognition (OCR) for the reading/scanning of data and biometric scanning (unique user fingerprint ID recognition) for the ultimate in security.

On Group's Keymax range of keyboards and devices have a sleek, modern design with a small footprint for economy of space. Keymax keyboards offer powerful multi-functionality for high performance, helping you to prevent fraud and increase efficiency.

No wonder Keymax keyboards are chosen by some of the world's largest enterprises.

KEYBOARDS

KEYMAX 1011

On Group's flagship keyboard.

This compact keyboard has the highest quality components, with laser engraved keys and the world's leading key switches.

Perfect for where functionality and limited desktop space is required, Keymax 1011 solves all keying and data entry challenges.

Keymax 1011:

- Any language keyboard layout
- MSR (Badge) and Smart as standard.
- Multi Port USB hub to allow other peripherals to be connected
- USB to RJ45 cable to allow easy hot swapping in the field. No need to crawl under desks or through walls to access existing cabling.
- Small, compact design
- Laser-engraved keys
- Key switches lasting 50 million hits
- Optional biometric scanning

KEYBOARDS

KEYMAX 1011NFC

On Group's flagship keyboard.

This compact keyboard has the highest quality components, with laser engraved keys, world-leading key switches and NFC technology.

Perfect for where functionality and limited desktop space is required, Keymax 1011NFC solves all keying and data entry challenges.

Keymax 1011NFC:

- Near Field Communication (NFC) for paywave technology
- Any language keyboard layout
- MSR (Badge) and Smart as standard.
- Multi Port USB hub to allow other peripherals to be connected
- USB to RJ45 cable to allow easy hot swapping in the field. No need to crawl under desks or through walls to access existing cabling.
- Small, compact design
- Laser-engraved keys
- Key switches lasting 50 million hits

KEYBOARDS

KEYMAX 301 Smart Card and MSR Keyboard

Compact in size and using a membrane pad Keymax 301 is the perfect space-saving keyboard with a multitude of functions that fit into tight budgets.

Smart card reading and writing, magnetic stripe reader for single, double and triple tracks, optional biometric scanning and customisable layouts all make Keymax 301 the complete teller mate.

Keymax 301:

- Any language keyboard layout
- MSR (Badge) and Smart as standard.
- Multi Port USB hub to allow other peripherals to be connected
- USB to RJ45 cable to allow easy hot swapping in the field. No need to crawl under desks or through walls to access existing cabling.
- Optional Biometric Scanning

KEYBOARDS

KEYMAX 301NFC

Compact in size and using a membrane pad Keymax 301NFC is the perfect space-saving keyboard with a multitude of functions that fits into tight budgets.

Near field communication technology, smart card reading and writing, magnetic stripe reader for single, double and triple tracks, optional biometric scanning and customisable layouts all make Keymax 301NFC the complete teller mate.

Keymax 301NFC:

- Near Field Communication (NFC) for paywave technology
- Any language keyboard layout
- MSR (Badge) and Smart as standard.
- Multi Port USB hub to allow other peripherals to be connected
- USB to RJ45 cable to allow easy hot swapping in the field. No need to crawl under desks or through walls to access existing cabling.

KEYBOARDS

KEYMAX 401 MSR Compact Keyboard

Compact in size and using a membrane pad Keymax 401 is the perfect space-saving keyboard with a multitude of functions yet still able to meet tight budgets. Magnetic stripe reader for single, double and triple tracks, optional biometric scanning and customisable layouts make Keymax 401 the complete compact teller mate.

Keymax 401:

- Any language keyboard layout
- MSR (Badge) as standard.
- Multi Port USB hub to allow other peripherals to be connected
- USB to RJ45 cable to allow easy hot swapping in the field. No need to crawl under desks or through walls to access existing cabling.
- Optional Biometric Scanning

KEYBOARDS

KEYMAX 501 Multi Hub Keyboard

Compact in size and using a membrane pad Keymax 501 is the perfect space-saving keyboard, with a multi hub port to connect 4 peripherals

Keymax 501:

- Any language keyboard layout
- Multi-Port USB hub to allow other peripherals to be connected
- USB to RJ45 cable to allow easy hot swapping in the field. No need to crawl under desks or through walls to access existing cabling.
- Optional Biometric Scanning

KEYBOARDS

KEYMAX 97

Innovative square style teller keyboard, with a multitude of functions. Completely customisable and programmable Keymax 97 comes with a smart card reader, magnetic stripe reader and optional CONTACTLESS and biometric scanning. Incorporating an inbuilt glide pad this is the optimum solution in saving counter space.

Keymax 97:

- Any language keyboard layout
- MSR (Badge) as standard.
- Multi-Port USB hub to allow other peripherals to be connected
- USB to RJ45 cable to allow easy hot swapping in the field. No need to crawl under desks or through walls to access existing cabling.
- Optional Biometric Scanning
- Laser Engraved keys
- Key switches lasting 50million+ hits

KEYBOARDS

KEYMAX 97NFC

Innovative square style teller keyboard, with a multitude of functions. Completely customisable and programmable Keymax 97NFC comes with a smart card reader, magnetic stripe reader and optional CONTACTLESS and biometric scanning. Incorporating an inbuilt glide pad this is the optimum solution in saving counter space.

Keymax 97NFC:

- Any language keyboard layout
- NFC standard to for paywave functionality.
- Multi-Port USB hub to allow other peripherals to be connected
- USB to RJ45 cable to allow easy hot swapping in the field. No need to crawl under desks or through walls to access existing cabling.
- Optional Biometric Scanning
- Laser Engraved keys
- Key switches lasting 50million+ hits

CHEQUE READERS

CHEQUEMATE 250

The Chequemate 250 facilitates cheque processing with speed and accuracy. Used in banks all over the world, Chequemate 250 is the leading MICR processing cheque reader.

Incorporating E13b and CMC7 formats coupled with an incredibly reliable MSR (badge reader) as well as an optional Smart Card reader, Chequemate 250 is the ideal device for your teller front end needs.

KEYBOARDS

KEYMAX MICR 100

Helping you prevent fraud and increase efficiency in one compact unit. Teller space is always a premium. Keymax MICR 100 solves that problem by incorporating a motorised MICR reader (e13b and cmc7), MSR (badge reader), smart card and a fully integrated glide pad in the keyboard.

Keymax MICR 100 frees up valuable desk space and is completely customisable to your needs.

KEYBOARDS

KEYMAX 101 MSR Original Keyboard

Tried, tested and proven, Keymax 101 has been successfully installed all over the world. Recently replaced by Keymax 401, Keymax 101 still has a place in organisations that appreciate this style of keyboard.

Compact in size and utilizing a membrane pad Keymax 101 is the perfect space-saving keyboard with a multitude of functions that accommodates small budgets. The magnetic stripe reader for single, double and triple tracks, makes Keymax 101 the complete teller mate.

Keymax 101:

- Any language keyboard layout
- MSR (Badge) as standard
- Compact design and style
- Tried tested and proven

KEYBOARDS

KEYMAX 5511 Budget Style Smart Card Keyboard

OnGroup's Keymax 5511 combines the efficiencies of a smart card reader and a PC keyboard into one unit, enabling easy implementation of smart card-based solutions. Its smart card readers activate the latest microchip technology conveniently protecting your security.

Keymax 5511:

- Any language keyboard layout
- Smartcard as Standard
- Low cost

KEYBOARDS & READERS

KEYMAX
870

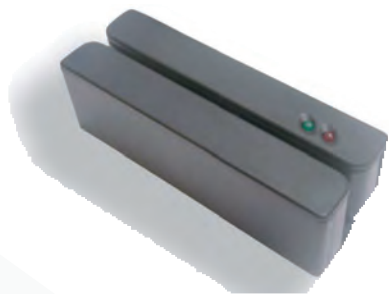

Budget Style
Keyboard with
Glide Pad

Keymax 870 is a low cost keyboard made for high volume requirements. Featuring an integrated glide pad and extremely compact size, it is the ideal keyboard for any large volume requirements.

KEYMAX MAGMAX SERIES

Small and Compact Magnetic Card (Badge) reader. Reads up to 3 tracks, in both Hi-Co and Lo-Co specifications. Great for when desktop real estate space is at premium. Both serial and USB interfaces available make connectivity a snap.

A customisable POS style keyboard. Suitable for POS applications. Great for retail environments that need a hardy keyboard with EMV smartcard, MSR and glide pad in all on compact design.

Keymax POS99:

- Any language layout
- Completely customisable for you application
- Removable keys
- Programmable keys
