KeyMax 1011 & 1011 NFC

MULTIFUNCTIONAL KEYBOARD FOR BANKING & INSURANCE

In today's financial world you can't afford to waste time, let errors slip through your fingers or expose your organisation to security breaches. It takes sophisticated equipment to help you handle encrypted documents and cards that are presented to your organisation.

By sophisticated we're talking about doing it all from one point, with an ergonomic, all-in-one keyboard that saves space, saves time, saves mistakes, prevents fraud, and is versatile with all the necessary functions required to process   payments and transactions. One compact keyboard that can do the lot. It has a concise, user-friendly design that doesn't sacrifice functionality.

The Ongroup KeyMax Teller series can handle most types of documents or transactions, making them a necessary time, space and cost saving solution for the fast-paced and competitive fields of banking, finance and insurance.

Swipe, scan, read, process - it's all at your fingertips.

KeyMax 1011 and 1011 NFC s efficient and enables you to perform a multitude of tasks. It provides security for the future and offers peace of mind. All that from one keyboard? KeyMax is the smart choice.
